

JAMES J. CHILDRESS

Department of Ecology, Evolution and Marine Biology
University of California
Santa Barbara, CA

Project: *Habitat Value of Shell Mounds to Ecologically and Commercially Important Benthic Species*

Education: B.A. Biological Sciences, Wabash College 1964
Ph.D. Physiology, Stanford University 1969

Positions: 1969-present Professor, Department of Ecology, Evolution and Marine Biology,
University of California, Santa Barbara, California.

Selected Publications:

- Felbeck, H., C. Arndt, U. Hentschel, and J.J. Childress. 2004. Experimental application of vascular and coelomic catheterization to identify vascular transport mechanisms for inorganic carbon in the vent tubeworm, *Riftia pachyptila*. *Deep-Sea Research* **51**:401-411.
- Childress, J.J., C.R. Fisher, H. Felbeck, and P. Girguis. 2003. On the edge of a deep biosphere: Real animals in extreme environments. *American Geophysical Union* volume on the subsurface biosphere. (in press)
- Girguis, P.R., J.J. Childress, J.K. Freytag, K. Klose, and R. Stuber. 2002. Effects of metabolite uptake on proton-equivalent elimination by two species of deep-sea vestimentiferan tubeworm, *Riftia pachyptila* and *Lamellibrachia cf. luymesii*: proton elimination is a necessary adaptation to sulfide-oxidizing chemoautotrophic symbionts. *Journal of Experimental Marine Biology and Ecology* **205**(19):3055-3066.
- Freytag, J.K., P.R. Girguis, D.C. Bergquist, J.P. Andras, J.J. Childress, and C.R. Fisher. 2001. A paradox resolved: Sulfide acquisition by roots of seep tubeworms sustains net chemoautotrophy. *P National Academy of Science USA* **98**(23):13408-13413.
